

DE::vector::operator=

DE::vector::vector

DE::vector::_copy

```
graph LR; A[DE::vector::operator=] --> C[DE::vector::_copy]; B[DE::vector::vector] --> C;
```

The diagram illustrates a relationship between three functions. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'DE::vector::operator=' and the bottom box contains 'DE::vector::vector'. On the right, there is a gray rectangular box with a black border containing the text 'DE::vector::_copy'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'operator=' and 'vector' functions utilize or call the '_copy' function.
